DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
 - a. Group I, claim(s) 1-31 and 45-47, drawn to a substrate holder.
 - b. Group II, claim(s) 32-44, drawn to a method of manufacturing the substrate holder.
4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
5. **Evidence of lack of unity among the claims groups is found in U.S. Patent Application No. 2002/0050246 to Parkhe.**
6. Parkhe teach a substrate holder (*104 Fig. 2A*) for supporting a substrate (*102 Fig. 2A*) comprising a supporting surface (*103 Fig. 2A*) with a cooling component (*107 Fig. 2A, Para. 0029*); a heating component positioned adjacent to the supporting surface and between the supporting surface and the cooling component (*105 Fig. 2A, Para. 0030*); a fluid gap (*236 Fig. 2A*) positioned between the cooling component and the heating component (*arrangement of 236 between 107 and 105 Fig. 2A*), the fluid gap configured to receive a fluid to vary the thermal conductance between the cooling component and the heating component implicitly through cooling (*Para. 0044, 0050*,

Art Unit: 1792

0051); and a brazing material is disposed between the cooling component and the heating component, the brazing material disposed adjacent to the fluid gap implicitly to form a hermetic seal with the substrate support (*Para. 0042*).

7. Group II requires the apparatus as disclosed in Group I. As such, the corresponding technical feature among the claim groups is not found to constitute a corresponding special technical feature based on the prior art. Hence, there is a lack of unity among the claim groups.

8. A telephone call was made to applicant's representative on 10/05/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

9. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

10. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
